EE 5726: Embedded Sensor Networks, HW 1

Dr. Zhaohui Wang

Department of Electrical and Computer Engineering
Michigan Technological University

Fall 2016

Problem 1

Please briefly describe three applications of WSNs. Each application will constitute one short paragraph, which is expected to include the main purpose of the WSN, the network components (e.g., what types of sensors are used), communication techniques, and networking protocols. Other issues, such as network deployment and maintenance, could also be included.

The assignment will be due in class on Sept. 8.
